

KUIDAS VALIDA SOBIV TOODE

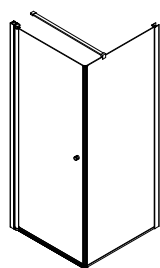

› Vastavalt ruumi võimalustele on mõistlik valida kas dušinurk, dušiuks nišši, vahesein või mõni kombineeritud variant.

› Piisava ruumi olemasolu korral alla 90*90cm (ruudukujuline) dušiala/nurk ei ole soovitatav.

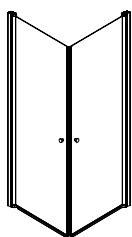

› Klaaside valikust kõige levinum on kirkas (T1), privaatsust suurendav toonitud hall (T2) ja praktiliselt läbipaistmatu siidmatistatud klaas (T3/Concept seerias) ning eksklusiivne Crystal Vision klaas (T4/Concept seerias).

KUIDAS VÕTTA MÕÕDUD

› Ruumi mõõtude puhul on vaja mõõdud võtta lõplikult viimistletud pindadelt ja kolmes eri kõrguses, et saaks veenduda ning vajadusel/võimalusel arvestada seinte vertikaalsuunalise kõverusega.

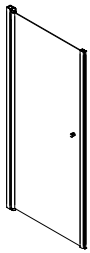

› Laeni ulatuvaid dušiseinu ei ole soovitatav paigaldada, sest neid on tülikas puhastada ja võib väheneda dušiala ventileeritavus.

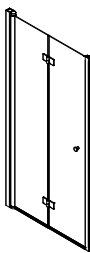

Dušitoote tellimisel on vajalik:

1. Eritellimisel dušinurgad - soovitatav võtta välisgabriidi mõõdud.
2. Niši ukse puhul - vajalik võtta laiuse mõõt kolmel eri kõrgusel. Niši uktsel koos lisaklaasiga on samuti vajalik võtta laiuse mõõt kolmel eri kõrgusel.
